## COVER LETTER

---

Dear SAP,

I am excited to apply for the Junior DevOps Engineer position for SAP. With a background in CI (Cloud Integration) Operations and a keen interest in development and operations, I am enthusiastic about the opportunity to contribute to your team and support SAP-related projects.

During my tenure as a CI Operations specialist at Digitall, I acquired my skills in cloud computing, infrastructure maintenance, and continuous integration practices. Operating within the SAP ecosystem, I collaborated closely with development teams to optimize integration processes and enhance system reliability.

I am well-versed in leveraging tools like Jenkins to establish robust CI/CD pipelines tailored to the specific requirements of SAP environments. These pipelines not only facilitated seamless deployment of applications but also enabled rapid iteration and feedback, fostering a culture of continuous improvement.

I am drawn to the opportunity to work with SAP technologies at SAP, as I recognize their significance in shaping the future of enterprise solutions. My background in CI Operations has equipped me with a solid foundation to seamlessly integrate into your team, contribute to ongoing projects, and drive operational excellence.

I will be glad to bring my passion and improve my skills for DevOps to SAP, and I am confident that my experience aligns well with the requirements of the Junior DevOps Engineer role. Thank you for considering my application. I am looking forward to the opportunity to discuss how my background and enthusiasm can contribute to the success of your team.

Best regards,

Dimitar Porkov
